CREATION QUEST

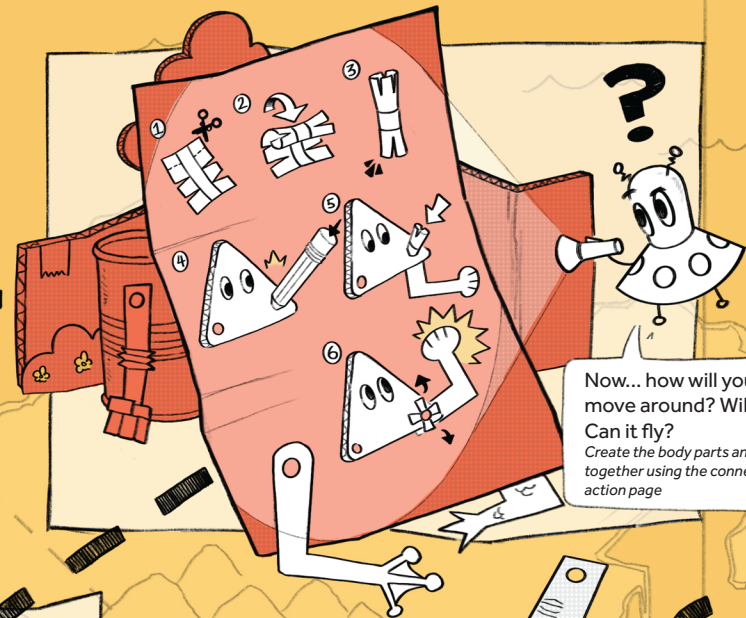

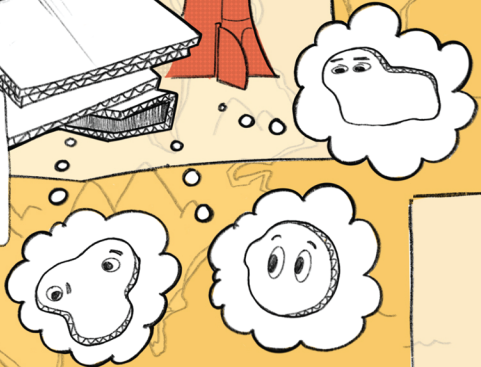

Learning through Play

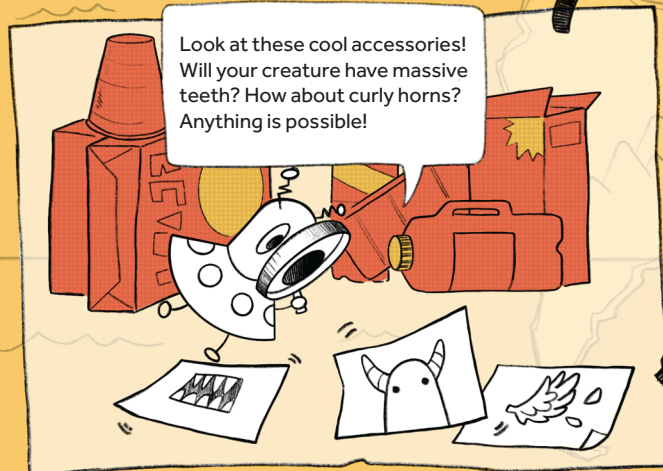

Zop has landed on Earth and wants to go on a quest to discover a new creature among the recycled materials that are around!
What if you join the quest and help them?

Let's start with the body...
What kind of body will this creature have? What materials can you use?

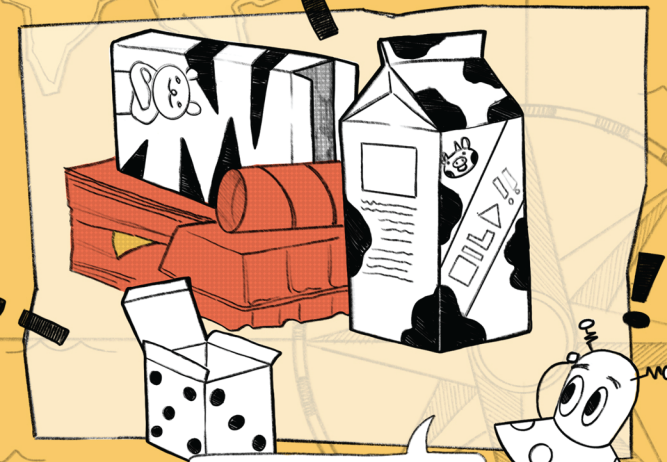

Now... how will your creature move around? Will it crawl?
Can it fly?
Create the body parts and put them together using the connectors in the action page

Look at these cool accessories!
Will your creature have massive teeth? How about curly horns?
Anything is possible!

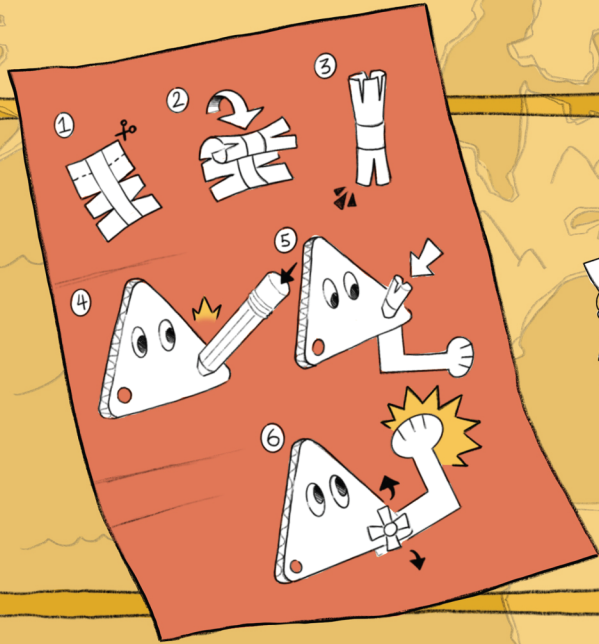

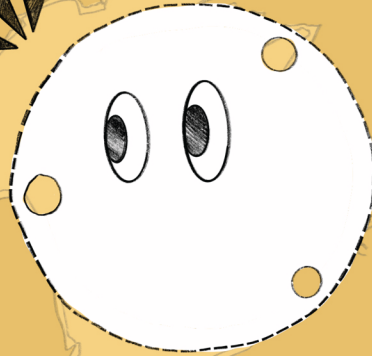

What is your creature's personality? Are they grumpy or happy? Why is this?
Make sure your creation reflects it.

Look at all the patterns on the packages you got! Can you give your creature a cool pattern?
Do you have a favourite animal that can inspire you?

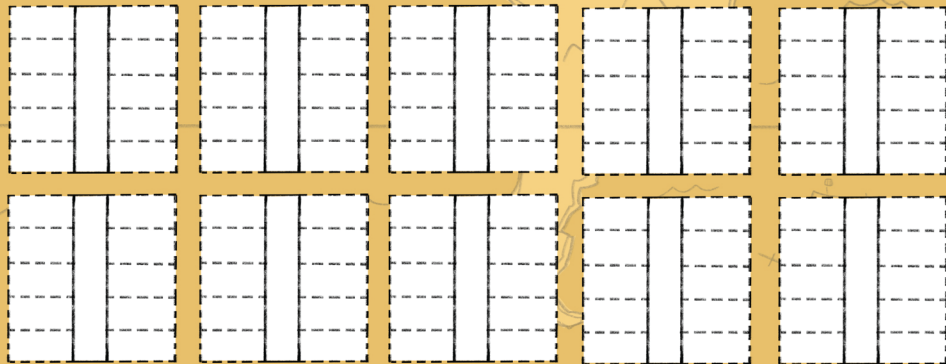

You can cut this circle on the side and use it as a start to create your creature. Then, you can look for recycled materials near you and create with them the different body parts and accessories. Let's get hands on!

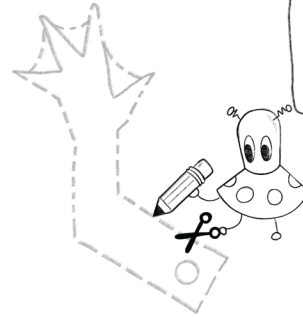

You could be wondering, how to put together the different parts of your creature? And we got a magical secret for you! These star connectors will allow you to join and re-join all the elements in a way that they move!

Cut the star connectors out carefully with scissors

Your creature is almost ready to travel! Use this space below and different recycled materials to draw and cut unique accessories and magical body parts.

And always remember... with materials you have around and connectors, you can build anything you can imagine!
